

A modern living room interior featuring a large, light-colored sectional sofa positioned on a raised wooden platform with three steps. The room has large floor-to-ceiling windows offering a view of a city skyline. A dark wood coffee table and a side table with a lamp are visible. The floor is made of light-colored wood in a herringbone pattern.

100% made in the Netherlands

Just as our woodwork is designed in-house, it is also manufactured entirely in-house. This work is the result of a process in which human qualities, along with the quality of technologies and materials, play a fundamental role.

- **Craftsmanship & Heritage**

We don't just make floors — we make foundations for life. Every plank is born from generations of Dutch craftsmanship, shaped with care, and finished by hand. It's in the details. It's in our DNA.

- **Natural Beauty**

We let wood be wood. The knots, the grain, the gentle shifts in tone — they're not flaws, they're features. Each floor celebrates nature's quiet artistry, bringing warmth and soul into your home.

- **Timeless Design**

Style fades. Character endures. Our floors are designed to feel right today, and even better with time. Because true beauty isn't fleeting — it grows with you.

- **Sustainability**

We believe in doing things right. That means using responsibly sourced oak, minimizing waste, and making products that last for decades. Floors you can walk on — with a clear conscience.

- **Honest Materials**

No shortcuts. No pretense. Just real oak, worked with real hands. What you see is what you get: solid, tactile, honest materials that age with grace and carry their story proudly.

- **Living Inspiration**

Our floors are made for life in motion — for barefoot mornings, everyday spills in the kitchen, and muddy boots by the door. They're not just beautiful. They're lived on. And that's where the magic begins.

REAL DUTCH FLOOR

About - The Classic Collection

The Classic Collection is the foundation of Real Dutch Floor's craftsmanship. Carefully sanded and enhanced with a distinctive 3D finishing technique, each board reveals a rich, velvety texture that adds warmth and depth to any interior.

With a refined palette of natural tones and available in boards, herringbone, and chevron patterns, the Classic Collection brings timeless character to both residential and commercial spaces — a quiet statement of enduring quality.

Real Dutch Floor's engineered oak floors are designed for optimal compatibility with underfloor heating and cooling systems. With a thermal resistance of $0.098 \text{ m}^2\text{K/W}$ across all collections — except for the Eco Collection, which offers an even lower value of $0.078 \text{ m}^2\text{K/W}$ — our floors ensure efficient heat transfer and energy savings. The standard 15 mm thickness provides an ideal balance between durability and thermal conductivity, delivering consistent comfort throughout the year.

About - The Design Collection

The Design Collection embodies contemporary refinement at its most deliberate. A sleek, planed surface treatment gives each floor a smooth, modern finish with a subtle play of depth — where light and shadow reveal the quiet beauty of the wood.

Available in boards, herringbone, and chevron patterns, this collection offers versatility without compromise. The Design Collection is crafted for interiors where clean lines and understated luxury set the tone.

About - The Eco Collection

The Eco Collection is where sustainability takes centre stage. With a thinner 13 mm composition, these floors are designed to minimize material use while maximizing performance — particularly with underfloor heating, where the reduced thickness ensures optimal heat transfer.

Available in both planed and brushed finishes, the Eco Collection offers the same commitment to quality and craftsmanship Real Dutch Floor is known for — in a form that treads more lightly on the planet.

OUR SOUL

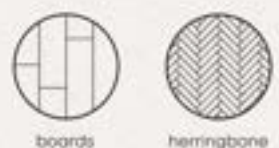

Weathered, honest
and warm:
every floor has a soul ^{p29}

About - The Forest Collection

The Forest Collection draws its character from the raw, untouched essence of nature. Crafted through a unique process that enhances the organic grain and texture of oak, each board carries the depth and warmth of the forest it originates from.

Enriched with earthy tones through careful manipulation of the wood, this collection brings a grounded, natural atmosphere to any interior. The Forest Collection is for those who appreciate authenticity in its most expressive form — where every surface tells its own story.

Real Dutch Floor's engineered oak floors are designed for optimal compatibility with underfloor heating and cooling systems. With a thermal resistance of $0.098 \text{ m}^2\text{K/W}$ across all collections — except for the Eco Collection, which offers an even lower value of $0.078 \text{ m}^2\text{K/W}$ — our floors ensure efficient heat transfer and energy savings. DESIGN - TAUPE
REAL DUTCH FLOOR

CLASSIC - ASH "Aged Look"
REAL DUTCH FLOOR

At Real Dutch Floor, traditional craftsmanship and modern technology work in unison. Every step of our production process is carefully designed for precision, efficiency, and consistency — without losing the character of natural oak.

By combining automated techniques with a deep respect for the material, we create floors that are not only durable and refined, but made to remain beautiful for generations.

Our advanced automatic finishing line ensures a consistently high-quality finish for every floor. This precision technology allows us to apply the Royal Protect finish evenly across our entire collection.

The ultra-matte lacquer enhances the natural appearance of the wood while offering lasting protection. Designed for everyday living, it helps your floor age gracefully — maintaining its refined look year after year.

At Real Dutch Floor, sustainability is woven into every detail of our process. From the materials we choose to the finishes we apply, each decision is made with care for both people and the environment.

Our finishes are developed using eco-conscious oils and lacquers that meet strict emission standards. Free from harmful substances, they contribute to a healthy indoor climate while protecting the wood beneath. By extending the lifespan of our floors, they reduce the need for maintenance and replacement — a natural step toward more responsible living.

Choosing Real Dutch Floor means choosing enduring quality with a mindful approach to the world around us.

Sustainability lies at the heart of Real Dutch Floor. We work with responsibly sourced wood and carefully considered production methods to minimize our ecological footprint.

Built to endure, our floors age with grace — reducing waste and the need for replacement over time. It is our belief that true sustainability starts with quality, craftsmanship, and a lasting respect for natural resources.

BIS/Prime Wood Selection

Where calm meets clarity. The BIS grade offers a serene, refined appearance with minimal natural markings — perfectly at home in contemporary interiors.

Experience refined simplicity with our BIS selection. Carefully selected to be nearly knot-free and exceptionally smooth, this premium grade creates a sense of balance and understated elegance. BIS allows the natural character of oak to unfold in its purest, most sophisticated form.

Sustainability is an integral part of Real Dutch Floor. We work with responsibly sourced wood and thoughtful production methods to reduce our environmental impact. Designed to last for generations, our floors contribute to less waste and enduring quality — with respect for both interiors and the planet.

Refined Elegance in Every Grain

The BIS/Prime selection represents the highest level of refinement within our wood grades. Chosen for its serene grain structure and flawless surface, this selection offers a calm and harmonious foundation that enhances the overall balance of a space.

With minimal natural variation, BIS/Prime is ideally suited for modern, minimalist, and high-end interiors where subtlety is key. Rather than drawing attention to itself, this refined selection brings a quiet sense of luxury, allowing architecture and interior design to take centre stage.

Rustic A: Where nature meets Sophistication

Add warmth and personality to your space. The Rustic A grade strikes the perfect balance between natural charm and subtle texture.

Experience the harmony of natural charm and timeless design with Rustic A. Featuring small, refined knots and gentle grain variations, this selection adds depth and warmth while maintaining a calm and sophisticated appearance. Rustic A brings authenticity into the space without overwhelming the interior.

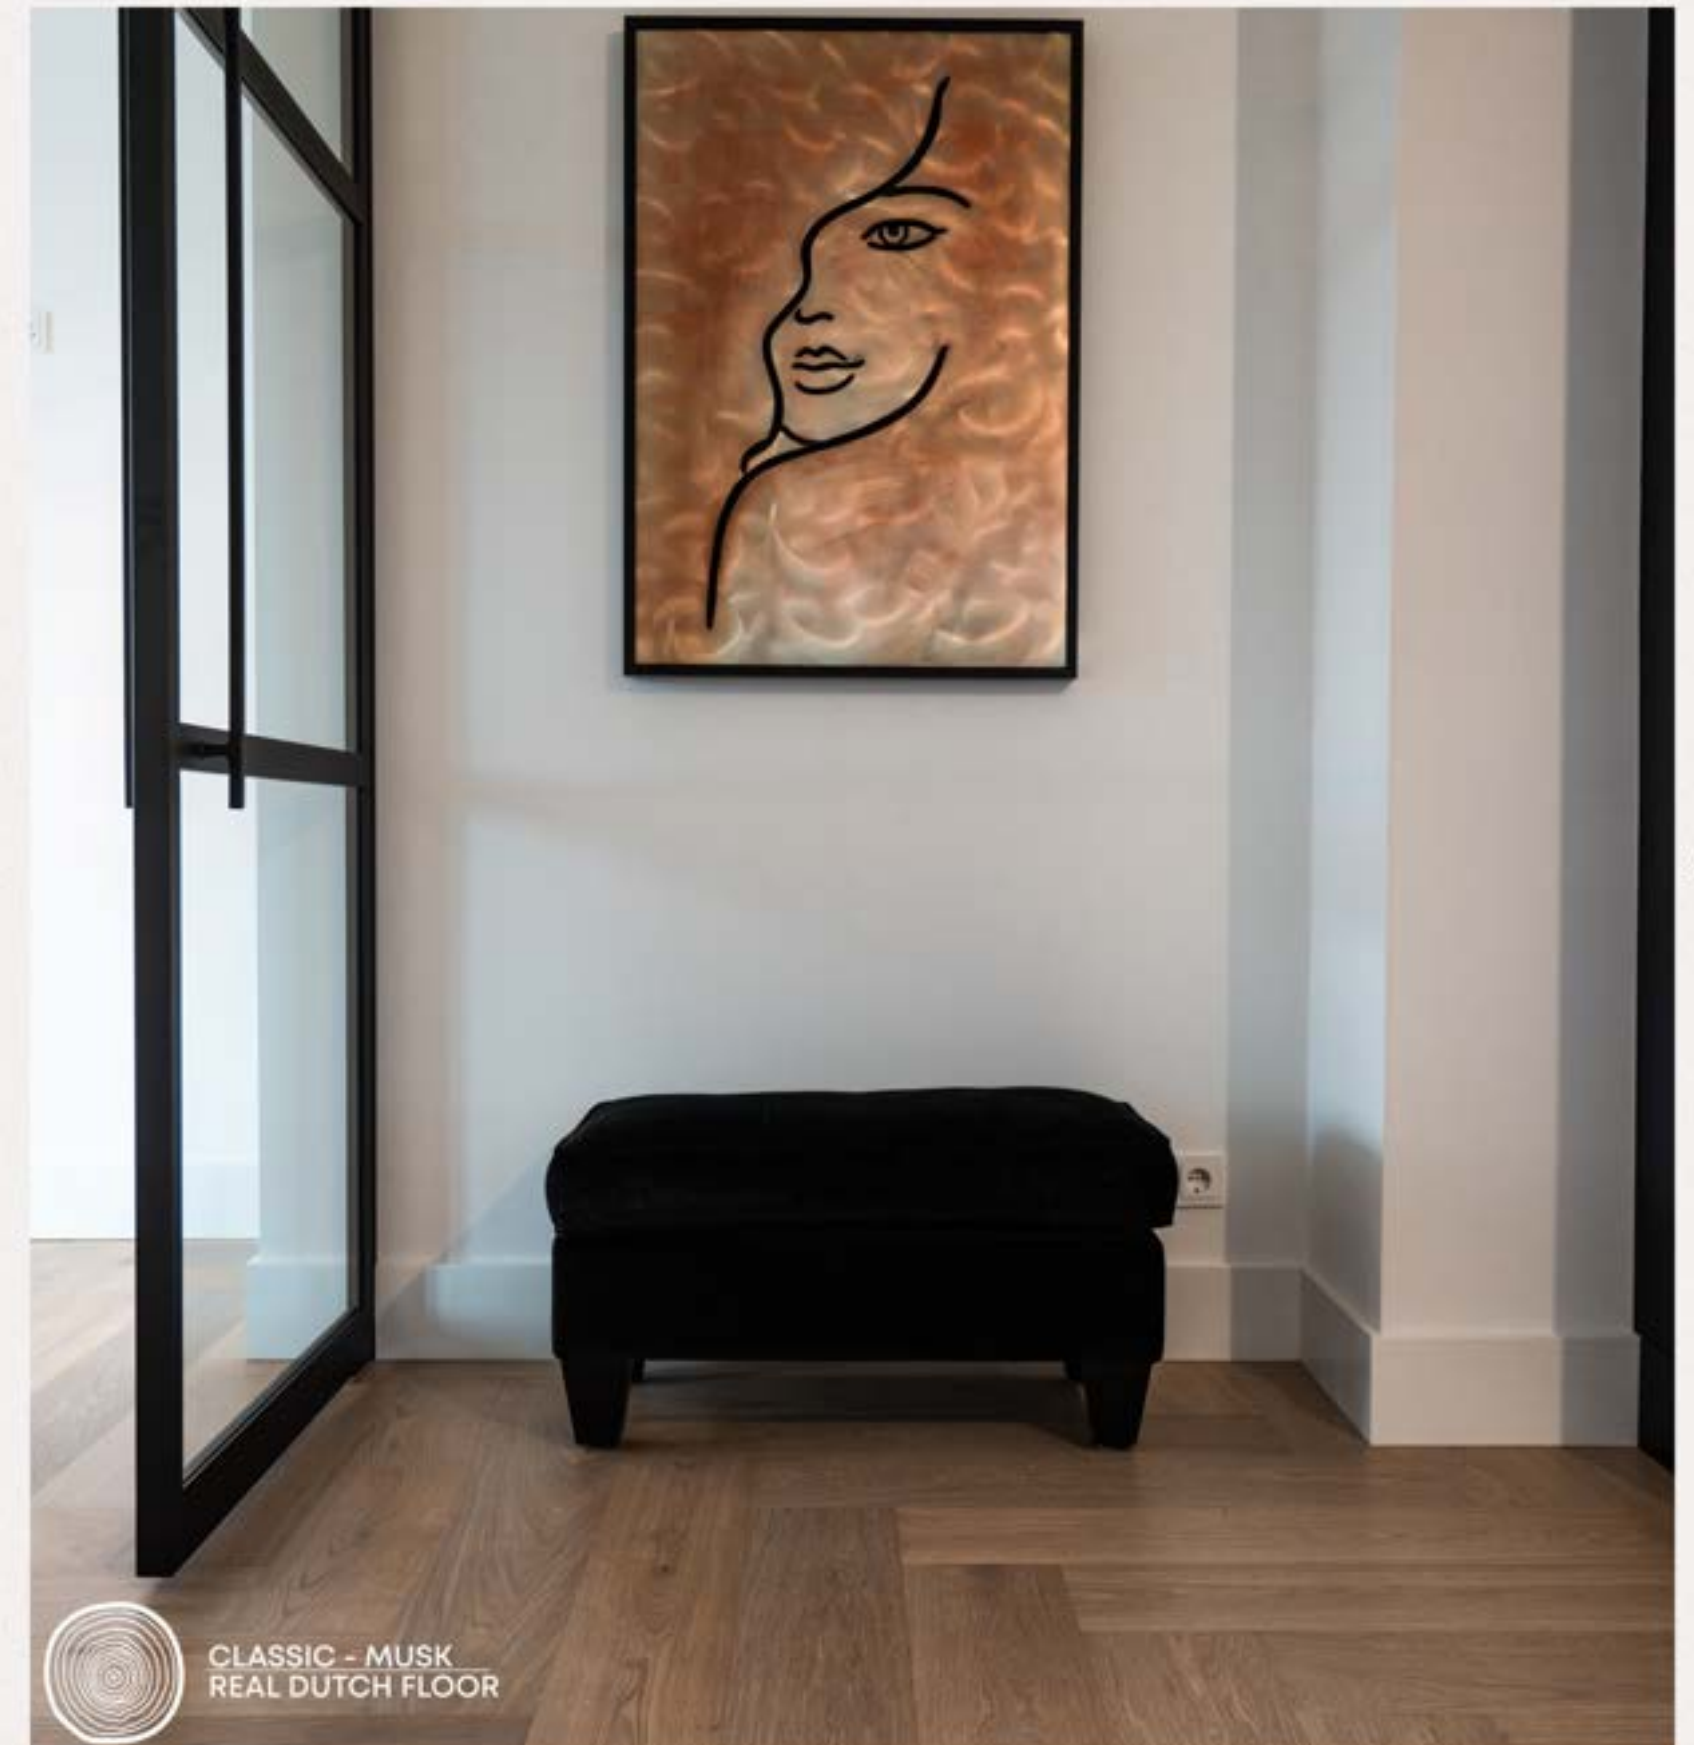

Designed with longevity in mind, Rustic A reflects Real Dutch Floor's commitment to responsible craftsmanship. By working with carefully selected oak and durable finishing techniques, we create floors that age beautifully and contribute to a more sustainable future.

Rustic A: Authenticity with a Timeless Touch

Embracing the natural characteristics of oak, the Rustic A selection adds depth and personality to every plank. Carefully chosen knots and subtle textures ensure that no two floors are exactly alike, creating a surface that feels genuine and alive.

With its balance of character and refinement, Rustic A enhances a wide range of interiors. From contemporary to classic settings, this selection brings a sense of warmth and authenticity, offering a lived-in elegance that feels both timeless and inviting.

Rustic A/B: Natural Balance with Subtle Character

Discover a harmonious balance between natural expression and refined elegance with the Rustic A/B selection. This grade introduces subtle variation, bringing warmth and character to an interior without losing its sense of calm.

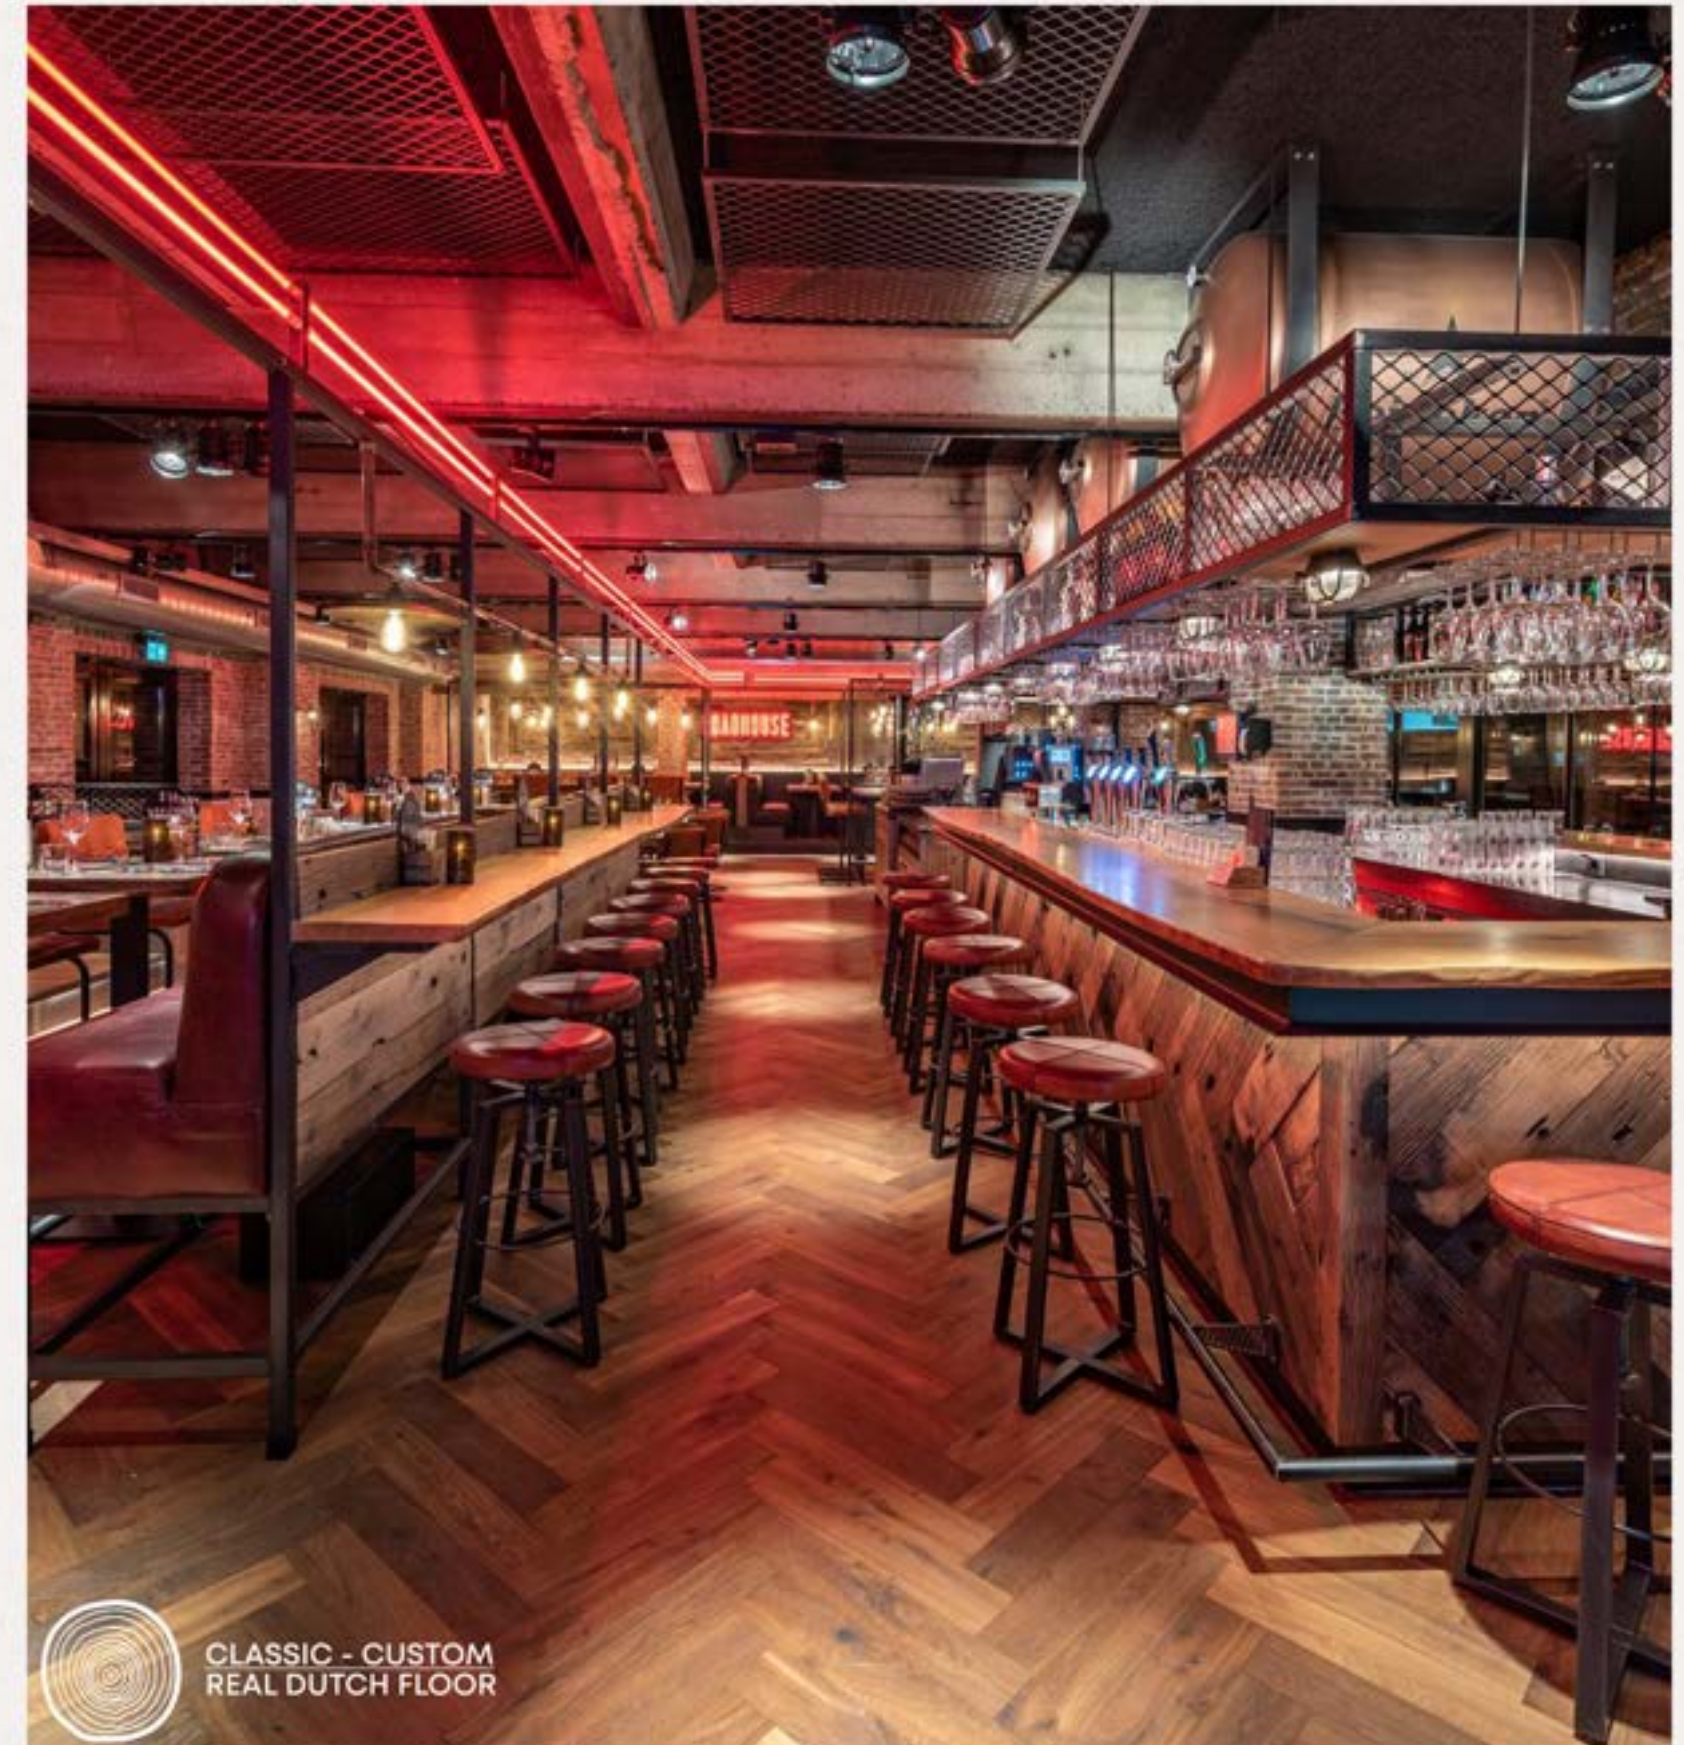

Featuring a balanced mix of small knots and smooth grain patterns, Rustic A/B adds depth and visual interest to the floor. The result is a natural, welcoming appearance that feels authentic yet controlled — ideal for interiors that seek character without excess.

Crafted with longevity and responsibility in mind, Rustic A/B reflects Real Dutch Floor's commitment to thoughtful material selection and durable craftsmanship. Designed to age gracefully, this selection contributes to enduring interiors and a more sustainable use of natural resources.

Rustic A/B: Embrace the Natural Beauty of Imperfection

Rustic A/B celebrates the authentic nature of oak: natural variations, subtle knots, and flowing grain patterns give each plank its own identity, creating a floor that feels lively, genuine, and rich in character.

With its balanced appearance, Rustic A/B complements both contemporary and classic interiors. It offers a sense of warmth and authenticity while maintaining harmony within the space — a timeless foundation shaped by nature and refined through craftsmanship.

Spaces Shaped by Oak

Every interior tells a story.

Of light falling across wood, of quiet mornings and long evenings, of spaces that feel grounded and timeless. Our floors are crafted to become part of that story — shaping the atmosphere of every room they enter.

In our projects, craftsmanship meets architecture. Each space reflects a dialogue between material, proportion and precision, brought together in perfect harmony.
